

VR SHARP TECH TOOL

WE DELIVER YOUR REQUIREMENTS

INTRODUCTION

To brief your regarding VR Sharp Tech Tool Manufacturing Capabilities, We are one stop solution fo all kinds of cutting tools, presently manufacturing and supplying to all major players in the field of automobile industries, oil & gas Industries, Copper and brass component manufacturig industries, aerospace industries, power generation industries, Electronic Industries, Orthopaedic implants & Medical sector.

VR Sharp Tech Tool Started in and prices. with an aim to provide the highest Level in terms of quality, delivery

We not only produce Tools
We are providing Total Solution...

VISION

To become the most preferred Indian brand for all types of cutting tools which meets Customers need at higher level of satisfaction that will provide total solution by investing in technology ahead of time.

MISSION

Our Mission is to satisfy and fulfill the needs of our customers and employees through continuous Product improvement a pleasant work environment and consistent financial growth.

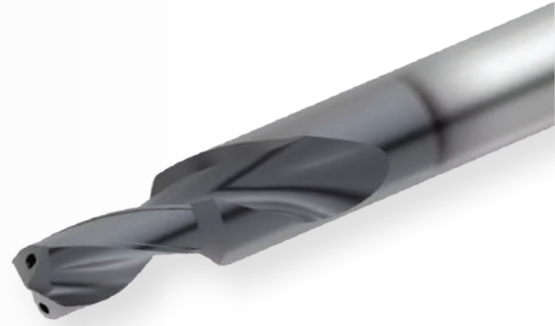

SOLID CARBIDE STEP DRILL

FEATURES

- 2,3 or 4 flute
- Helical or straight flute
- Single or multiple diameter
- Single or double margin
- Solid or coolant through

APPLICATION

- Specific point geometries
- Automotive Industry
- Ideal for drilling tap holes with countersinks.
- Coated for maximum performance, & high drilling efficiency.
- Refined micro-edge
- Industrial Application

SOLID CARBIDE TCH DOUBLE MARGINE LONG DRILLS

FEATURES

- Cutting specs identical to single-margin drill
- HSN2 Coating for longer tool life
- Improved surface quality
- Borehole cylindricity and straightness

APPLICATION

- Best suited for steel machining
- ALUMINIUM machining
- Aerospace Industry efficiency.

CARBIDE CENTER DRILL

FEATURES

- Better Life & productivity
- Carbide Center Drills comes with 118° Point angle
- HSN2 COATING for less wear
- Made from Micro-Fine Carbide Grade

APPLICATION

- Automotive Industry.
- Bearing Industry.
- Furniture manufacturing.
- Spring Manufacturing Industry
- Aerospace Industry
- Other manufacturing Industry

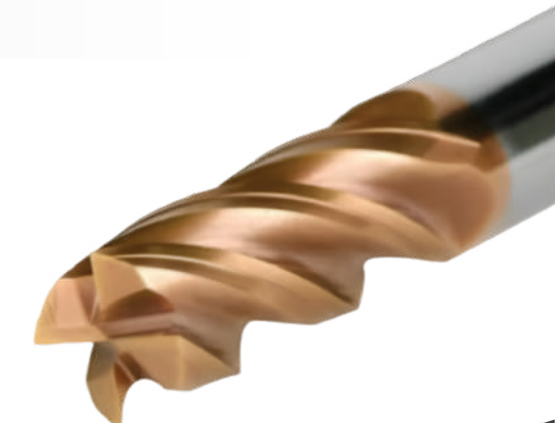

SOLID CARBIDE ENDMILL 4 FLUTE

FEATURES

- 2, 3, 4, 5, 6 & 8 flute
- Helix changes along flutes
- Straight or tapered
- Stable cutting with higher speed
- Multi helix/index, single/multi dia
- Square, chamfer, or small radius
- Solid/coolant-through, HSN2 coat
- Submicron grain carbide

APPLICATION

- Die & Mould Industry
- Aerospace Industry
- Automobile Industry

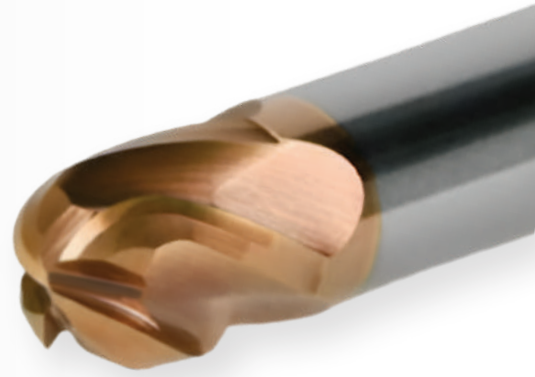

SOLID CARBIDE BALL NOSE 2 FLUTE

FEATURES

- Stub
- Extra Long Length
- STRONG GEOMETRY for high performnace
- StandardLong Length
- 2 & 4 flute

APPLICATION

- Automobile sector
- Die & Mould Industries
- Aerospace Industries

THREAD MILL CUTTER

FEATURES

- Heavy duty
- HSN2 coating for tool life
- Finish and Accuracy
- Threads with excellent form
- 4 & 6 flute

APPLICATION

- Industrial Applications
- Machining Industry

SOLID CARBIDE ROUGHER ENDMILL

FEATURES

- 4, 6 & 8 flute
- Chip breaking geometry
- HSN2 Coating for longer tool
- Excellent heat dissipation in heavy cuts
- Special flute shaape geometry

APPLICATION

- Power generation Industry
- Aerospace Industries
- Medical Industry
- Die & Mould Industries

SOLID CARBIDE REAMER

FEATURES

- Multiple flute options
- Solid or coolant through
- Super finishing reamer technology
- Helical or straight flute
- Straight, tapered or step designs

APPLICATION

- Power generation Industry
- Aerospace Industries
- Medical Industry
- Die & Mould Industries

SOLID CARBIDE INJECTOR BORE REAMER

FEATURES

- Increased Tool Life 2x
- Super surface finish
- Excellent Roundness and Size Control
- Enhanced Feature TIR
- Lowered CPU

APPLICATION

- Automobile Industry

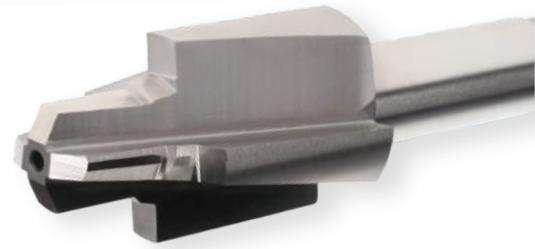

PORT TOOL

FEATURES

- Perfect concentricity
- Easy Complex form
- Multiple flute options
- Solid or coolant-through, performance coated
- High accuracy & Cost saving
- Solid Carbide or Brazed Tipped
- Helical or straight flute
- Standard SAE or specials

APPLICATION

- Machine Industry

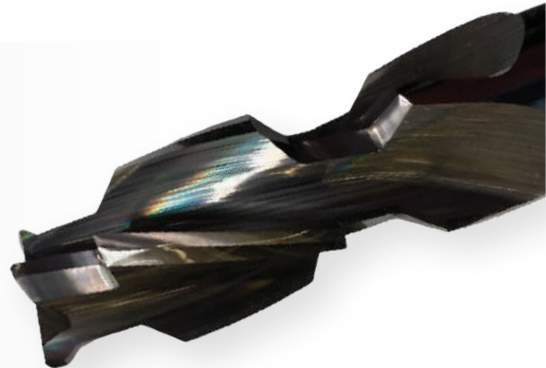

FORM TOOL

FEATURES

- Easy operations
- Multiple flute options
- Longer service life
- Helical or straight flute
- Robust construction
- High surface finish
- Customize design to avoid extra tools
- Solid or coolant through Coated to maximize performance

APPLICATION

- Construction Industry

CARBIDE T SLOT CUTTER

FEATURES

- Strong body
- Compact size available in 1 to 15 mm width
- Staggered design high cutting performance
- Superior Quality

APPLICATION

- Aerospace Industry
- Applicable Machinery: CNC and Traditional Lathe.
- Energy Industry
- Automotive Industry
